Y. Dalkilic
A. Gul
PREFACE

Volume and Organization

This is the volume of Proceedings of the International Symposium of the European Water Resources Association on Water Resources Management: Risks and Challenges for the 21st Century. The Symposium took place in Izmir, Turkey between September 2-4, 2004 and was organized by Dokuz Eylul University Water Resources Management Research and Application Center (SUMER), Izmir. It was supported by

- The National Technical University of Athens / School of Rural and Surveying Engineering
- The Scientific and Technical Research Council of Turkey (TUBITAK)
- Water Foundation of Turkey, and
- EGEPEN Deceuninck

During the Symposium, a total number of 115 papers were received and 88 fully submitted whereas scientists from various European countries and other parts of the world took place in the discussions of the Symposium.

This volume contains most of the keynote papers and the papers accepted for oral presentation. The presentation of the papers is organized according to the basic themes of the Symposium.

On behalf of the organizing committee, we have to thank all who assisted in organizing this symposium. The support of all participating organizations is acknowledged. In particular, many thanks are expressed to HISDAS HALKLA ILISKILER who supported SUMER in various aspects of the organization.

Scope and Objectives of the Symposium

Proper management and protection of the world’s water resources are recognized as prerequisites for sustainable development. This recognition has evolved through a series of international conferences, starting with the Mar del Plata Conference of 1977, the International Conference on Water and the Environment in Dublin in 1992, and the UN Conference on the Environment and Development (UNCED) in Rio in 1992. UNCED has resulted in Agenda 21, which is described as “an action plan for the 1990s and 21st century, elaborating strategies and integrated programme measures to halt and reverse the effects of environmental degradation and to promote environmentally sound and sustainable development in all countries”. It was recognized in Agenda 21 that, due to rapid population growth, urbanization, industrial and agricultural development, water scarcity has become a significant problem in most parts of the world. The quality of surface waters, aquifers and coastal zones is continuously degrading throughout the world. There is significant concern over the
slow rate of progress towards the sustainable use and development of water resources for health, food production, and income generation. Land resources reflect a similar situation; overuse or mis-use of these resources has resulted in land degradation, particularly in the form of deforestation and desertification. All these problems have gradually led to physical or ecological degradation of physical habitat for biodiversity. There are further environmental challenges due to ozone depletion and climate change, which affect various components in a number of interactive ways.

All the above problems have stemmed from unsustainable exploitation of living and nonliving resources, and the result is the alarming environmental crisis we live in today. Unfortunately, water resources lie at the core of this environmental crisis. At the beginning of the 21st century, water crisis still remains a major challenge the humankind has to face. International conferences such as the 2nd World water Forum in The Hague in 2000, the International Conference on Freshwater in Bonn in 2001 the Rio+10 Summit in Johannesburg in 2002, and finally, the 3rd World water Forum in 2003 have delineated that the basic factor which underlies water crisis is the improper management of this resource. In recognition of this fact, the UN World Water Development Report of 2003 has identified 11 different challenges related to water resources, ranging from Basic Needs and the Right to Health to Governing Water Wisely for Sustainable Development. The main themes of the Symposium cover the 11 major challenges identified in the UN World Water Development Report of 2003, namely:

- Basic Needs for Water and the Right to Health
- Protecting Ecosystems for People and the Earth
- Cities: Competing Needs in an Urban Environment
- Securing Food for a Growing World Population (related to agricultural uses of water)
- Promoting Cleaner Industry for Everyone’s Benefit
- Developing Energy to Meet Development Needs
- Mitigating Risk and Coping with Uncertainty
- Sharing Water: Defining a Common Interest
- Recognizing and Valuing the Many Faces of water
- Ensuring the Knowledge Base
- Governing Water Wisely for Sustainable Development

The basic objective of the EWRA Symposium on “Water Resources Management: Risks and Challenges for the 21st Century” was to follow up on the assessment of water-related problems, provided by the UN World Water Development Report and to address the major challenges for the 21st century. These issues were analyzed through case studies from different parts of Europe. In particular, the Symposium focused on the preparations and arrangements for capacity building of the European countries to deal with the new challenges, risks and difficulties in water resources management.

EUROPEAN WATER RESOURCES ASSOCIATION (EWRA)
EXECUTIVE COMMITTEE MEMBERS

The Executive Committee of EWRA for the period 2003 to 2006 after the elections held during the General Assembly 4th September 2002 is as follows:

President  Prof. George TSAKIRIS
Lab. of Reclamation Works and Water Resources Management
School of Rural and Surveying Engineering
National Technical University of Athens
9 Iroon Polytechniou, 157 73 Athens – Greece
Tel.: +30 10 7722700, Fax: +30 10 7722632
E-mail: gtsakir@central.ntua.gr

Vice-President  Prof. Jean-Marie MONGET
CIG/GSTI – Ecole des Mines de Paris
Rue Claude Daunesse – BP 207
F-06904 Sophia Antipolis Cedex
Tel.: (33) 0493957513, Fax: (33) 0493654304
E-mail: monget@cig.ensmp.fr
Web site: http://www.cig.ensmp.fr/~monget/

Secretary General  Prof. Jan LUNDQVIST
Department: Tema vatten
Linkoping University
581 83 Linkoping - Sweden
Tel.: 46 13 282272, Fax: 46 13 133630
E-mail: janlu@tema.liu.se
Web site: http://www.tema.liu.se

Treasurer  Assoc. Prof. Rodrigo Jorge Fonseca de Oliveira MAIA
Department of Civil Engineering
Section of Hydraulics, Water Resources and the Environment
University of Porto
Rua Dr. Roberto Frias
4200-465 Porto – Portugal
Tel.: +351 22 508-1916, Fax: +351 22 951-6661
E-mail: rmaia@fe.up.pt
Web site: http://sifeup.fe.up.pt/sifeup/web_page.inicial?P_LANG=0

Membership Coordinator  Assoc. Prof. Vasselin ALEXANDROV
National Institute of Meteorology and Hydrology
66 Tsarigradsko shose Blvd.
BG-1784 Sofia, Bulgaria

# TABLE OF CONTENTS

## VOLUME I

### Keynote Papers

**Water and Development**  
*D. Prinz*  ................................................. 3

**Water resources management in the coastal zone: issues of sustainability**  
*K. Fedra* ................................................................. 23

**Water And Urban Environment: Reality And Prospective**  
*M. Benedini* ................................................................. 39

**Risk and challenges for the 21st Century**  
*N.X. Tsiourtis* ............................................................... 63

**Development of The Euphrates-Tigris Basin**  
*Ü. Özış Y. Özdemir, Y. Dalkılıc, F. Türkman, T. Baran* .............................. 85

### THEME I. Basic Needs for Water and the Right to Health

*C. Akkaya & A. Efeoglu* ............................................................... 99

**Spain’s Hydraulic Mission: Conflict, Power, and Mastering of Water**  
*E. Swyngedouw* ................................................................. 117

*M. Kaïka* ................................................................. 131

**Transboundary Water Management in Greece:**  
The Case of River Nestos/Mesta  
*E. Eleftheriadou* ............................................................... 147

### THEME II. Protecting Ecosystems for People and the Earth

**Distributed Surface - Groundwater Nitrogen Dynamics**  
**Numerical Modeling in the Seine River Basin**  
*J-M Monget & C. Viavattene* ............................................................... 157

**Effects of Human Activities on Water Quality in Case of**
Mogan-Eymir Basin
S. Ozkul & F. Barbaros ................................................................. 167

Planning and Settling Management Principles of Renewable
Resources for Improving Water Yield in the Yuvacik Dam
Watershed in Izmit, Turkey
A. Hizal, M. Zengin, Y. Serengil, A. Karakas, & M. Ercan ................... 181

Coruh River Dam Projects And Their Ecological Impacts
A. Tufekcioglu, L. Altun, H.Z. Kalay, R. C. Schultz & M. Yilmaz ............ 193

Upland Conversion in Crete Island
E. Doukakis ...................................................................................... 205

Treatment of Polluted Surface Waters with Organophosphorus
Pesticides by an Electrolytic Oxidation System
D. Arapoglou, A. Vlyssides, N. Christopoulou, A. Pala & A. Labropoulos .... 213

The Use of Neural Network Technique for the Prediction of
Water Quality Parameters of Axios River in Northern Greece
M.J. Diamantopoulou, V.Z. Antonopoulos & D.M. Papamichail ............ 223

The Investigation of Solid Waste Landfill of Mersin on the Water
Quality and Application of Wqm-Cal Model
Z. Ozer, H. Kumbur, Z.L A. Demirel, D. Ozsoy ................................... 235

Quality Status of the Razlog Karst Aquifer (South-West Bulgaria)
M. Machkova, B. Velikov, D. Dimitrov & N. Neytchev .......................... 243

Water Quality and Riparian Buffer Functions - What Research Tells Us?
R.C. Schultz, A. Tufekcioglu, T. M. Isenhart
J.P. Colletti, J.W. Raich, W.W. Simpkins .............................................. 255

Rehabilitation Works’ Effects on the Water Quality
and on the Ecosystem of South Lake of Tunis
M. Kochlef & S. Gana ............................................................................. 265

Designing Riparian Buffers to Improve their Function
R.C. Schultz, Aydin Tufekcioglu, T.M. Isenhart,
J.P. Colletti, J.W. Raich, W.W. Simpkins .............................................. 275

The Use of Activated Carbon From Olive Oil Mill Residue,
for the Removal of Color from Textile Wastewater
A. Pala, P. Galiatsatou, E. Tokat, H. Erkaya,
C. Israilides & D. Arapoglou ................................................................. 287

Coastal Vulnerability and Risk Parameters
E. Doukakis .......................................................................................... 297
THEME III. Securing Food for a Growing World

Importance of Mussel Production Against Increase of Food Demand
H. Sereflisan, S. Cek, Y. Yildirim, M.A. Gokce, M. Sereflisan, I. Akyurt ................................................................. 307

Recent Studies in Water Quality and its Importance in Aquaculture
Y. Yildirim, S. Cek, H. Sereflisan & I. Akyurt ................................................................. 319

Agrometeorological Aspects of Drought in Bulgaria
During Last Decade (1994-2003)
V. Kazandjiev & N. Slavov ................................................................. 331

Sex Control in Aquaculture
S. Cek, Y. Yildirim, H. Sereflisan & I. Akyurt ................................................................. 343

Water Quality for Irrigation – Problems in Vojvodina
A. Belic, R. Savic & S. Belic ................................................................. 355

Inorganic and Organic Fertilisation of "Leeks" Cultivated in Pots:
Yield, Plant Mineral Content and Microbial Quality
C. Guerrero, L. Faleiro, P. Pita, J. Beltrão & J. Brito ................................................................. 363

Determination of Social and Economical Indicators for Future Wateruse Scenarios in Gediz River Basin
C. P. Çetinkaya, F. Barbaros & H. Gundogdu ................................................................. 375

Characterization of Agro-Hydrologic Regions in Greece
G. Papaioannoua, Th. Pliakas, C. Petroua, N. Diamantakis & P. Kerkides ................................................................. 385

Modeling pollution due to extensive irrigation in an encircled coastal area
C. J. Koinakis & H. N. Mpimpas ................................................................. 397

A Methodological Framework based on Fuzzy Set Theory for Irrigation Management
O. Manoliadis & G. Karantounias ................................................................. 409

Evaluation of a Subsurface and Surface Trickle Irrigation System
Applied on Cotton Plantations in Central Greece
D. Kalfountzos, I. Alexiou, S. Kotsopoulos, P. Vyras & S. Kampeli ................................................................. 417

Water Use Conflicts on the Land Reclamation Territory
S. Belic & A. Belic ................................................................. 429

Reservoir Water Pollution in Agricultural Catchment and Priorities for Action
R. Savic, S. Belic & A. Belic ................................................................. 439
THEME IV. Developing Energy to Meet Development Needs

The Role of Hydropower in Sustainable Development
A. Gurbuz................................................................. 451

Feasibility Study Of A "Popular Base" Investment In The Renewable Sources Energy Sector: A Special Case Of A Hydro-Power Plant
V. Kanakoudis & M. Podimata.................................................. 463

Global and Local Trends in Hydropower
I. Unsal, B. Onoz & B. Yegen .................................................. 475

VOLUME II

THEME V. Cities: Competing Needs in an Urban Environment

Y. A. Papadimitrakis & A.N. Findikakis.................................................. 485

Wastewater Reuse in the Mediterranean Basin-Problems and Challenges
D. Fatta, I. Arslan Alaton, C. Gokcay, I. Skoula, A. Papadopoulos & M. Loizidou .................................................. 499

A New Hybrid Membrane-Flotation Cell for Water Treatment and Purification
F. Peleka, P. Mavros, D. Zamboulis & K.A. Matis .................................. 509

An Exposure-Risk Assessment Study For Izmir Drinking Water
P. Kavcar, Z. Acar & S. C. Sofuoglu.................................................. 519

Social and Technical Strategies to Overcome a Possible Water Crisis in the Thrace Region and Istanbul in the Near Future
F. Konukcu, A. Istanbulluoglu & I. Kocaman .................................. 531

Domestic Water Supply in Developing Countries: Problems and Remedies
M. Kavvas.................................................................................. 545

A Free Water Surface Constructed Wetland Used for Treating Municipal Wastewater in Sparta
G. Bourazanis................................................................. 557

Industrial Pollution in a Semi-enclosed Coastal Area; a Numerical Study
H. N. Mpimpas & C. J. Koinakis.................................................. 569
THEME VI. Mitigating Risk and Coping with Uncertainty

Flood Mitigation Planning Using Promethee
R. D. Maragoudaki & G. P. Tsakiris ................................................................. 581

Prediction of a Water Balance Short Drought Index From Rainfall Indices over Greece
G. Papaioannou, P. Kerkides, P. Markopoulos & A. Mitropoulos ................. 593

Regional Floods Analysis: The Use of Vice Versa Performance Measures in the Evaluation and The Selection of an Appropriate Model Among Various Satisfactory Models
I. A. Atiem & N. B. Harmancioglu ................................................................. 605

Extreme Value Analysis of The SPI Time Series
I. Bordi, K. Fraedrich, M. Petitta & A. Sutera .................................................. 617

On the Assessment of Climatic and Drought Scenarios on Runoff in Mediterranean Island River Basins
G. Tsakiris, D. Tigkas & D. Pangalou ............................................................... 627

Managing Uncertainty in Multi-Reservoir Operation through Adaptive Fuzzy Inference Systems
G. Giuliano, A. Cancelliere & G. Rossi ............................................................. 639

Multifractal Tools Applied to the Study of Precipitation Extremes
M. I. P. Lima, D. Scherzer, S. Lovejoy, J. L. M. P. De Lima & M. F. E. S. Coelho ................................................................. 651

Large-Scale Analysis of Drought in Europe Using Ncep/Ncar and Era-40 Reanalysis Data Sets
I. Bordi, K. Fraedrich, M. Petitta & A. Sutera .................................................. 665

A Methodology for Estimating the Digital Elevation Model Uncertainty in Flood Inundation Modeling
M. Yilmaz, Z. Akyurek & N. Usul ................................................................. 675

Channel Capacity Analysis of Laka Stream for Floods
B. Kaya, R. Daneshfaraz, A. Alkan & E. Eris .................................................. 687

Management of Drought
N. O. Baykan & C. Ozcelik ............................................................................. 693
THEME VII: Ensuring the Knowledge Base

The Need For Integration in Environmental Data Management
N. Harmancioglu, P. Geerders, O. Fistikoglu & S. Ozkul................................. 707

Influence of Data Errors on Groundwater Quality Monitoring
Network Assessment and Redesign
Y. Mogheir, J.L.M.P. De Lima & V.P.Singh.................................................... 713

Utilization of Geoinformation Tools in Water Management Studies
G. Onusuel & A. Gul ......................................................................................... 723

Broadcasting a Unified Vision of a Transboundary Water Basin
Using Internet: The Mesta-Nestos Example
A. Karakos, X. Skoulikaris, J.M.Monget & C. Viavattene............................... 733

Alternative Gis Methods for the Derivation of Watershed Physiographic
Information and its Impact on Synthetic Unit Hydrographs
S.N. Kavalieratou, P.E. Georgiou,
D.M. Papamichail & D.N. Karamouzis.......................................................... 743

Monitoring and Assessing Internal Waters (Lakes) Using
Operational Space Borne Data and Field Measurements
M. Stefouli, D. Dimitrakopoulos, J. Papadimitrakis & E. Charou.................... 755

Use of NOAA/AVHRR Based Vegetation Condition Index (VCI)
And Temperature Condition Index (TCI) for
Drought Monitoring in Thessaly, Greece
E. Tsiros, C. Domenikiotis, M. Spiliotopoulos & N.L. Dalezios........................ 769

Optimal Design of Pumping Networks in Coastal Aquifers
Using Evolutionary Algorithms
A. Mantoglou & M. Papantoniou ...................................................................... 783

THEME VIII & IX. Governing Water Wisely for Sustainable Development &
Sharing Water: Defining a Common Interest

Pilot Implementation of EU Policies in
Acheloos River Basin and Coastal Zone, Greece
N. P. Nikolaidis, N. Skoulikidis & A. Karageorgis........................................ 797

EU Accession Process and Water Legislation Changes in Turkey
E. Saner ............................................................................................................. 811

Multicriteria Ranking of Water Development Scenario Using
a Fuzzy Rule Based System
G. Tsakiris & M. Spiliotis............................................................................... 825
Assessing Wetland Conditions in the Lake Victoria Basin of Kenya
Using Integrated Land-Use and Water Resources Integrity Indicators
W.O. Ochola, P. Kerkides, J.O. Ayieko ................................................................. 835

Aspects of Design and Benefits of Alternative Lining Systems
M. Riaz & Z. Sen..................................................................................................... 847

Water Resources Management of Sapanca Lake
L. Yilmaz................................................................................................................. 865

THEME X. Recognizing and Valuing the Many Faces of Water

Underground Dams: A Tool of Sustainable Development and Management of Groundwater Resources
H. Onder & M. Yilmaz ............................................................................................ 877

Comparative Evaluation of Methodologies Used in The Determination of the Hydraulic Properties of Porous Media
G. Kargas, P. Patsialou & P. Kerkides .................................................................. 891

Methodologies of Reconnaissance and Evaluation of the Environmental Planning Impacts: For the Protection or Conservation E.Koutseris ............................................................................................................. 903

THEME XI. Modeling as a Tool in Decision-Making

Modeling Stratification-Mixing Processes at The Mouth of a Dam-Controlled River
G. K. Sylaios, V. A. Tsihrintzis & K. Haralambidou .............................................. 917

Modeling the Groundwater Flow and Mass Transfer of Nitrates and Chlorides in the Pinios River Delta Aquifer
G.P. Karatzas & K. Koltsida .................................................................................. 927

Evaluation of Suitability Criteria in Stochastic Modeling
T. Baran & U. Bacanli............................................................................................ 937

Modeling the Rainfall-Runoff Process Using the Slurp Watershed Model and Artificial Neural Networks
P.E. Georgiou, M. Diamantopoulou & D.M. Papamichail .................................... 949

Study of Flows in Stepped Channels
G. Bombar & S. Guney........................................................................................... 959

Application of Factor Analysis in the Assessment of Surface Water Quality in Buyuk Menderes Basin in Turkey
H. Boyacioglu & O.Gunduz .................................................................................... 971
VOLUME III

Water Resources Management For Sustainable Development:
National Problems And Approaches
A. Vahap TURAN ................................................................. 981

Stability Analysis On A Lagoon Ecosystem
K. Ziogas & K. Bellos ............................................................ 989

Soil Water Balance In Horizontal Infiltration
C. Tzimopoulos, C. Evangelides, G. Arampatzis & A. Tsaousis ..................... 999

Investigation Of The Use Of Ikonos Data To Estimate The Irrigation Needs
For Crops In A Medium Size Mediterranean Hydrological Basin.
G. Metaxas & G. Karantounias .................................................. 1009

Fuzzy Simulation Of Soil Water Balance For The Case Of
Two Dimensonal Unsteady Flow
Ch. D. Tzimopoulos, I. N. Chalkidis, K. N. Moutsopoulos,
St. Yannopoulos, M. Sakellariou & Ch. H. Evangelides ............................ 1017
